AWARDS

Arles 2013: D.Monteleone Prix Carmignac

On the 3rd of July, as part of the Rencontres d'Arles, **Nathalie Gallon**, Director of the Award, announced the winner of the fourth Carmignac Gestion Photojournalism Award. It went to photographer **Davide Monteleone**, member of the VII agency, for his work on Chechnya. He knows the country well and regularly spends time in Russia, as well as his native Italy. His photos in large format black and white were taken during a five-month stay in the Chechen Republic. He has tried to show the changes the country has gone through since his first photo-reportages.

This award comes of course with €50,000 to support the work of photojournalists for the production of a themed project that engages directly with current events. The Foundation also provides an exhibition platform and the publication of a monograph for the prize winner after their reportage has been completed and purchases four of the photographs from the work. Remember that each year the Foundation chooses a theme which hasn't been sufficiently covered in spite of its importance in current affairs. As Édouard Carmignac puts it: "While we have never been exposed to as many images as we are now, they have never been so poor. This is why we ask photographers to cover areas that have been insufficiently documented." Candidates themselves decide on their modus operandi with respect to their theme and what political, economic, social or cultural slant to put on it. "Their take must be part of a humanist tradition consistent with a sensitive approach to reality ..."
